Let's Work Smarter Together, Thank you for choosing Trophy Deveopers

We will create a responsive, user-friendly and easy car listing directory. An agent (user) can register here free, purchase a car listing package and add his own car here. Admin also can add cars from the admin panel in this script and if wants can stop the other agents adding their listing.

We will develop using the popular PHP framework, Laravel. So, it can easily be customized by other programmers. Developers will be able to understand the source code easily and can modify the database and files if needed.

Features
This script has some awesome features. We are giving those below:

1.   Easy and simple interface
2.   Fully responsive
3.   Clean codes
4.   Easy Installation in domain or subdomain
5.   Data statistics in dashboard
6.   User Registration with email verification
7.   User account forget password option
8.   Wishlist items option for agent
